## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-5 and 8-26 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art fails to teach "sending billing data including the service start time and the service end time in the service suspended state, and determining whether a service resumption request is generated", as cited in the claim.

Regarding independent claim 8, the prior art fails to teach "constructing billing data, including a final service suspended period being the accumulated value of service suspended periods and sending the billing data to a billing processor, when the service ends, wherein service suspension periods are interruptions of service by the system, and determining whether a service resumption request is generated", as cited in the claim.

Regarding claims 11 and 21, the prior art fails to teach "designating an unique index upon request for service suspension during a service" as cited in the claims.

Regarding claim 23, the prior art fails to teach "producing a total service suspended period by multiplying the number of service suspension occurrences by an average service suspended period, subtracting the total service suspended period from an overall service, and billing a subscriber forward a resulting normal service period", as cited in the claim.

Regarding claim 24, the prior art fails to teach "the service suspended period is an interruption of service by the system, and determining whether a service resumption request is generated", as cited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
